Introduction

This mini book is about Project Blue Beam. Believers in this project claim that this is or was a secret NASA venture.

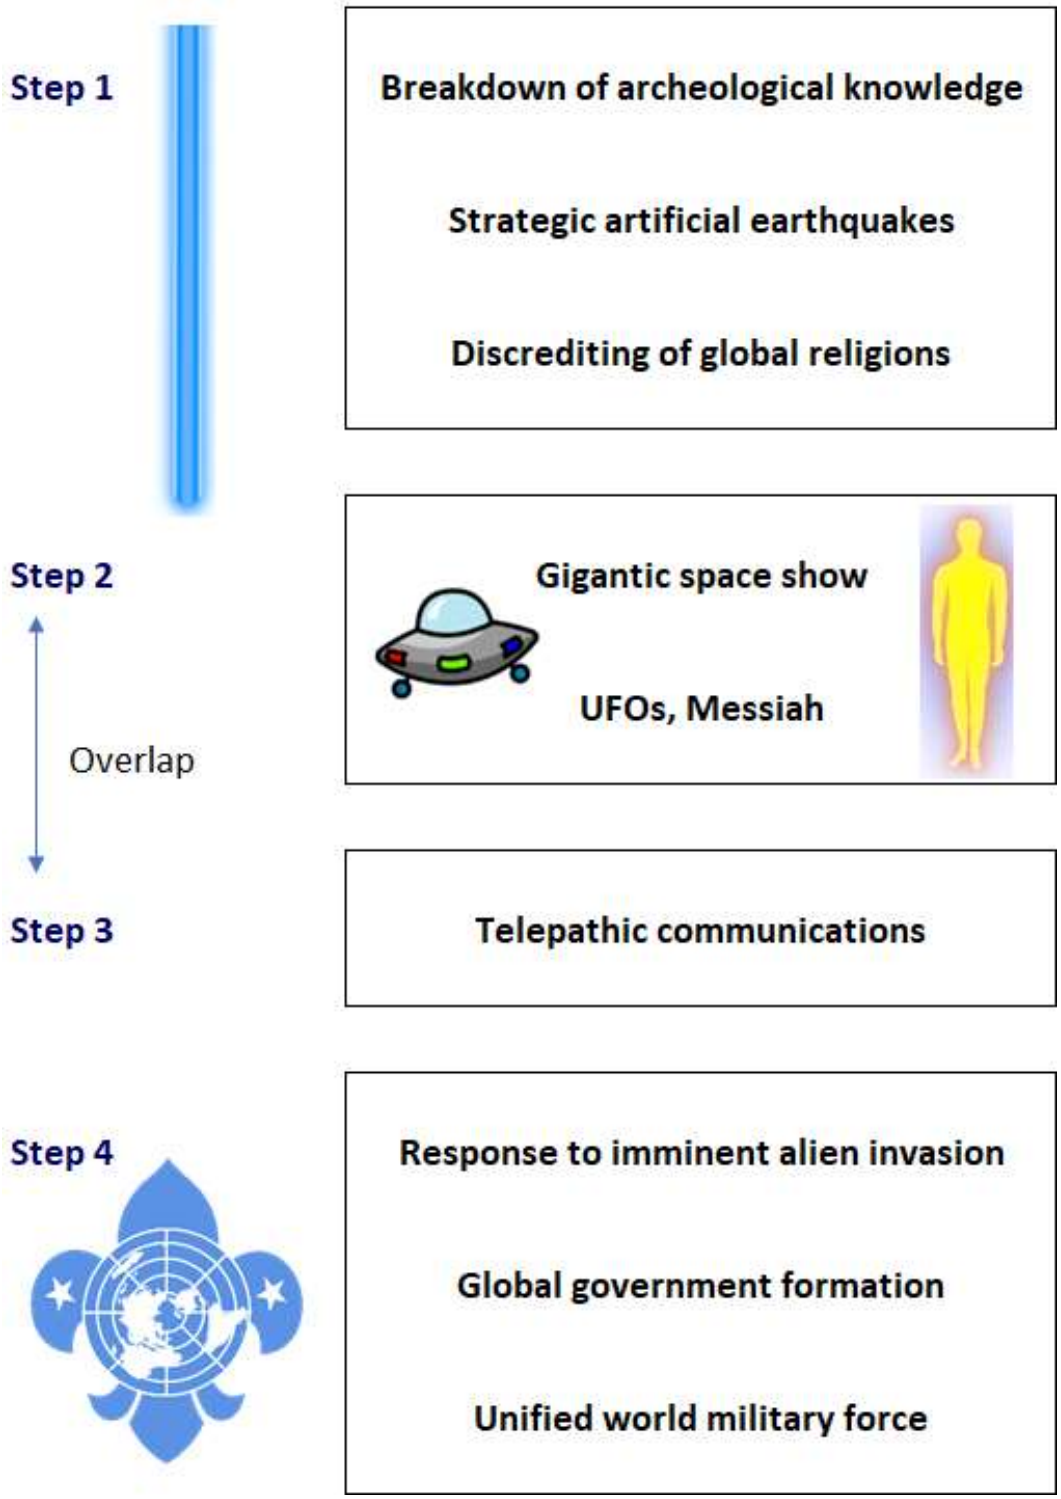
This text contains three main sections. This segment provides historical context that underpins analysis chapters.

The second part centers around the claim that Project Blue beam has four execution steps. These are: Breakdown, UFOs, Languages transmission and Leadership responses.

The third chapter centers around ancillary topics in the literature. These include a discussion of leading public commentators and how they link this project to religion.

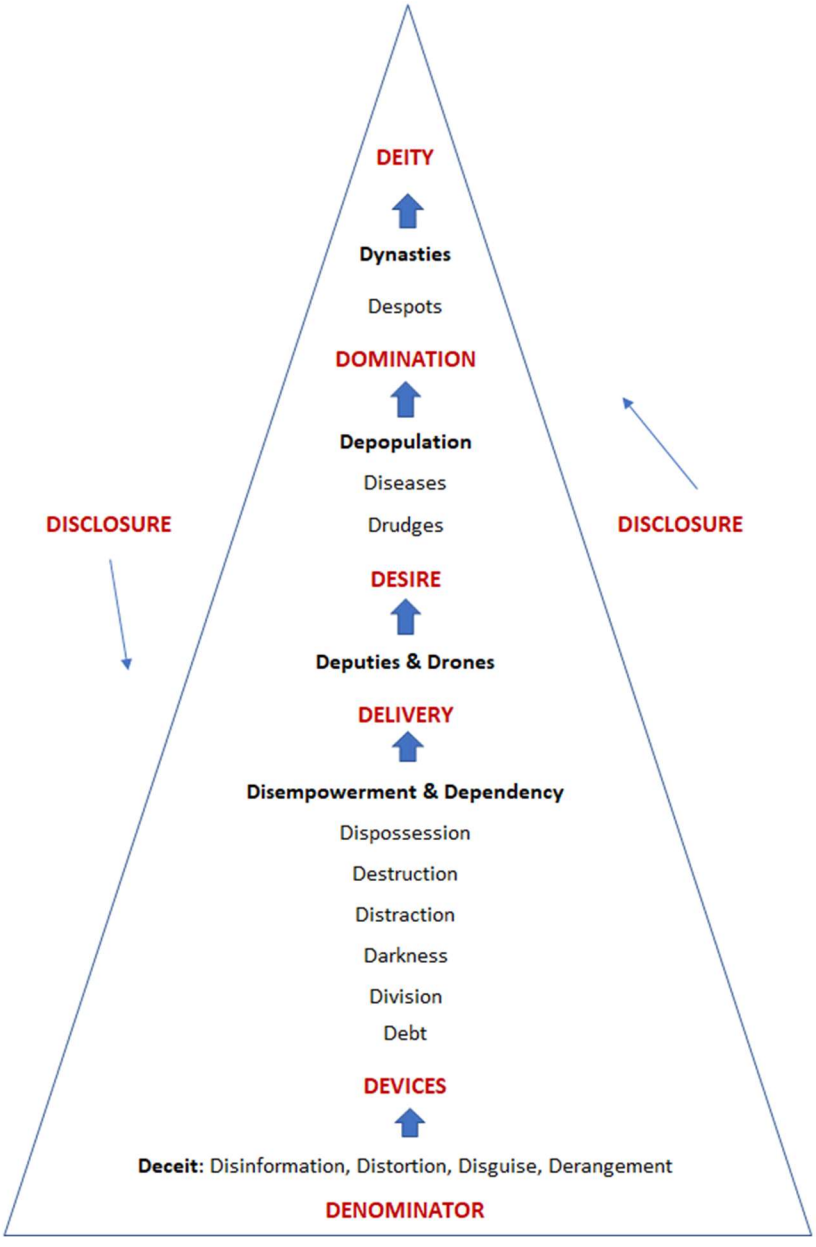
The concluding two subsections examine contemporary developments in geo-politics that may relate to a clandestine project that bears similarities to Blue Beam, which retains unofficial, *i.e.* unproven folklore status. These real events bear uncanny resemblances to Blue Beam.

This diagram below, created by this author, aims to visually summarize the four operational components of **Project Blue Beam** as theorized by Monast (1983) et *al.** .



* Annex 1 contains this Monast (1983) citation.

The dominant theme in the Project Blue Beam independent literature is a claim that Blue Beam is a hoax masterminded by NASAs controllers during the prior century, possibly as early as the 1960s. The goal of this deceptive project aims to use the fear of alien invasion to fool the world population into accepting the instant need for a One World Government and a one world military force managed by a globalist corrupt institution such as the United Nations. This single event may accelerate the Deep State playbook diagram theorized by this author (Jericho, 2019, p. 65).



Breakdown

A component of the first step is the public challenging of orthodox archaeological knowledge by those who control mainstream narratives. This example published by National Geographic may provide an example for those who are keen to independently verify this author's argument that global media are currently challenging long established archaeological theories and narratives.

Stanford University, mastermind of the devious MK Ultra mind control project, want the global populace to believe that their bio-forensic scientists have confirmed the existence of a micro sized human that could fit in the palms of an adult's hands. All research is about trust, no more.

Readers may obtain a clearer resolution by visiting this website direct. To this author – this statement is merely a hunch. This figurine looks fake, phony and false. What do you think?

Earthquakes

Numerous independent researchers claim that there are more earthquakes occurring in 2019 than at any time during the past century. These select examples may inspire readers to independently confirm these claims via their own research.

Latest Earthquakes Worldwide

ds.iris.edu/seismon/eventlist/index.phtml

737 earthquakes of magnitude > 4.0, for uniform distribution

Deep State syndicate member 9 News maintains a dedicated Earthquakes news section.

9NEWS 9news.com.au/earthquakes

This is a news collection page about earthquakes, including latest alerts from around the world, videos, pictures and eyewitness accounts. The biggest, most recent earthquake took place in Lombok, in Indonesia, which left hundreds dead. Earthquakes also frequently take place in Australia but tend to only measure a magnitude of three or four and rarely cause any damage. The largest earthquake recorded on record is generally regarded to be the Great Chilean Earthquake of 1960, which was measured at 9.5 and left around 1600 people dead and around two million people homeless. Get latest information about earthquakes today and breaking news headlines.

Strong quake kills one, collapses building in Philippines

California's earthquake history since the 1900s is worthy of a thick historical handbook.

Religions

The Western group of nations collectively comprise far more political, military and economic power than its nearest rival – the single nation of China. This powershift is changing. Christianity, including its numerous denominations, is easily the most influential Western religion. To change the religious power balance in the West would require the discrediting of major Christian icons such as the Old Testament, New Testament, Jesus Christ, Virgin Mary and Christian Prophets.

Many scholars of the natural sciences openly portray science and religion as incompatible. This is not a universal opinion. For example, many academic chemists and physicists are openly Christian or members of other faiths. The main way that the mainstream fake news media discredit Judeo-Christian faiths may be by selectively quoting 'objective' statistical data surveys.

https://www.washingtonpost.com/religion/2019/11/15/christianity-is-declining-rapid-pace-americans-still-h

Christianity is declining at a rapid pace, but Americans still hold positive views about religion's role in society

https://www.theguardian.com/world/2019/oct/17/americans-less-christian-religion-survey-pew

Americans becoming less Christian as over a quarter follow no religion

This author theorizes that the fake news cartel (CNN, Fox, MSNBC, Reuters *et al.*) would be overplaying their hand if they tried to discredit the validity of the existence of Jesus. Most of America's citizens may instantly divorce these toxic fake news channels if they dared to 'go there'.

The tight knit mainstream media cartel and blog news sites of their elite university friends have published articles in recent years that seem to downplay the influence of religions at the global level. These illustration articles were quantitatively dominant in 2015 and 2016 and wane around 2017. The reasons for this timeframe are not clear and require in-depth quantitative research.

bbc.com/news/world-33256561 26 June 2015 By Ed Stourton

The decline of religion in the West

blogs.lse.ac.uk/usappblog/2016/09/05/religion-is-in-decline-in-the-west-and-america-is-no-exception/

*The US is often taken to be a contrary case to the general decline of religion in the West. **David Voas** and **Mark Chaves** find that religiosity is in fact decreasing in the US, and for the same reason that it has been falling elsewhere. They comment that Americans are not becoming less religious over their lives; rather, the more religious generations born in the early 20th century are dying off and being replaced by newer generations that are less likely to be religious.*

This opinion article published *The Washington Post* in 2019 is worthy of special mention. Certain ultra-powerful Deep State playbook newspapers such as *The New York Times* and *The Washington Post* never casually publish a range of opinions for the sake of variety and balance.

Opinions washingtonpost.com/opinions/2019/04/15/organized-religion-is-paying-price/

Organized religion is losing its followers

The Washington Post is owned by one of the world's top five wealthiest men, Jeff Bezos. It is not clear to this author who is the true power behind the Bezos public relations front man throne.

False flags

A false flag is a fake terror event. The actors, *modus operandi* and motives behind these stunts are not accurately reported in the mainstream media. The media may knowingly publish false details. They may be fed phony information by a corrupt entity such as a government authority.

RE (2014)

False flags empower masterminds such as Queen Beatrix to use a crisis to pass draconian laws or start war for profit. The public support these responses as they believe that the Government is protecting them from terror. Missing Flight MH370 was used to stage the fake MH17 narrative as a pretext to start war with Russia. Number 17 in fake news is code for a 'deep state' operation.

MH17 Departure: Amsterdam Years in service: 17 Maiden flight on 17 July 1997

An incident occurred at 17,000 feet on 17 July 2014

Location: Ukrainian airspace 48°8'17"N 38°38'20"E

UFOs

Virtually all public commentators who write and speak about Project Blue Beam claim that images of Unidentified Flying Objects (UFOs) is the second stage of this scheme. This may be achieved via a hologram technology. A hologram is merely the projection of a real or false (*i.e.* human manufactured) image onto other matter such as a wall, cloud or cloudless sky.

Beijing has experimented with psychological operations that project images onto skies in rural areas in China to monitor peoples' reactions. Realistic, credible videos uploaded by Chinese residents online are easy to find on multiple online platforms such as blogsites and YouTube.

HuffPost (2015) is one news outlet among many that report a bizarre fake image of a city on clouds in rural China. First trial psy-ops work best away from big cities as mass panic may result.

The US Army (2017) reports that hologram technology existed in the 1970s. You need to believe in insano fairytales to believe that the author name on this public issue military document is real.

Holography: The Next Disruptive Technology

by Tomoko Sano

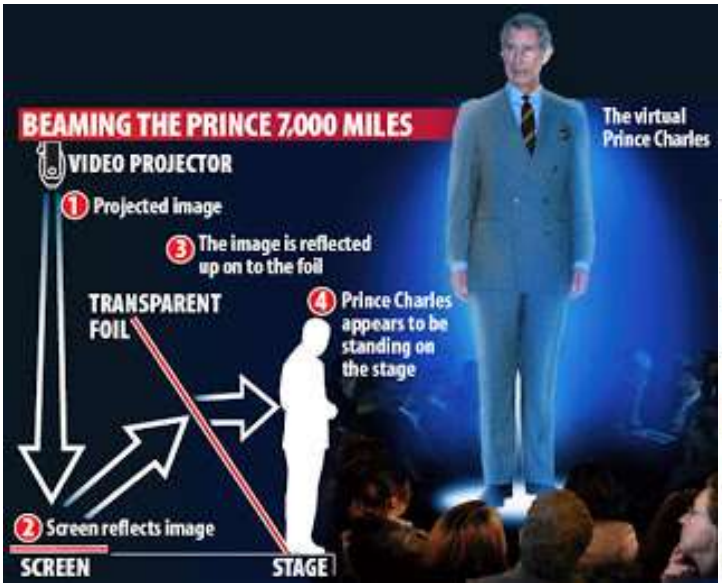
arl.army.mil/arlreports/2017/ARL-TR-8007.pdf

1. Introduction

arl.army.mil/arlreports/2017/ARL-TR-8007.pdf

The definition of holography is reflection of light projecting an object that is not physically there. The Hungarian–British physicist Dennis Gabor invented holography while trying to correct aberrations in the electron microscope, which led to his Nobel Prize award in Physics in 1971.[1] Since then a variety of methods of holography have been invented. Some are no more complicated than a modern version of "Pepper's Ghost", a 19th-century theatrical illusion in which an actor dressed as a ghost would be reflected off of a plate of glass. The audience would

This is an example of a holographic projection. King (since *circa* 2015) Charles Saxe-Coburg & Gotha delivered a holographic speech in Abu Dhabi from a location 7,000 miles away.



Hologram prince hails new money for alternative energy

theguardian.com/environment/2008/jan/2

Corporate media widely reported this latest bold display of Buckingham Palace fakery in 2008.

Some Project Blue Beam theorists claim that the apparition of UFOs will be accompanied by images of one or more deities or prophets. These will likely be the deity or prophet that is dominant and influential in that region/nation. The image of the Muslim Prophet Mohammed is an obvious example that may translate to Muslim majority countries such as Kuwait and Iran.

This graphic image below shows multiple UFOs. Portrayal of a nuclear holocaust and the generic image of a spiral crowned luminated male figure are visible. Chemtrails are present.

Ponty (*circa* 2014)

Various artists use different depictions of Project Blue Beam. Because Project Blue Beam does not officially exist, there is no custodian authority that owns the images of this false flag narrative.

Area 51

No region or topic probably excites independent UFO and space tech military researchers more than the infamous Area 51 military base in the Nevada Desert. This news article is dated 1947.

American League Wins All-Star Game

Miners and Operators Sign Highest Wage Pact in History

The best way to prove that this news article is not as fake as a seventeen dollars US Treasury note is to visit several independent paper archive repositories in multiple countries. This exercise merely proves that paper copies of this digital image exists. It proves no more than this. These paper copies may be fakery plants. This is our reality. Much speculation about the existence of UFOs is traceable to the so-called Roswell Flying Saucer incident that was widely witnessed in New Mexico in 1947. Supposedly. 72 years later, it is near impossible to know whether this story is folklore fairy dust, a genuine staged false flag psychological operation or a genuine UFO event.

Mass UFO sightings by civilians in America on the ground happen in desert states such as Arizona, Nevada and New Mexico more than all other states combined. The reasons for this phenomenon are not certain. Many avalanche phone calls made to local radio stations report the same details. The same applies to videos online uploaded by people who claim to freely share their identity and location of their home. Of course, such disclosures could be disinformation fakery.

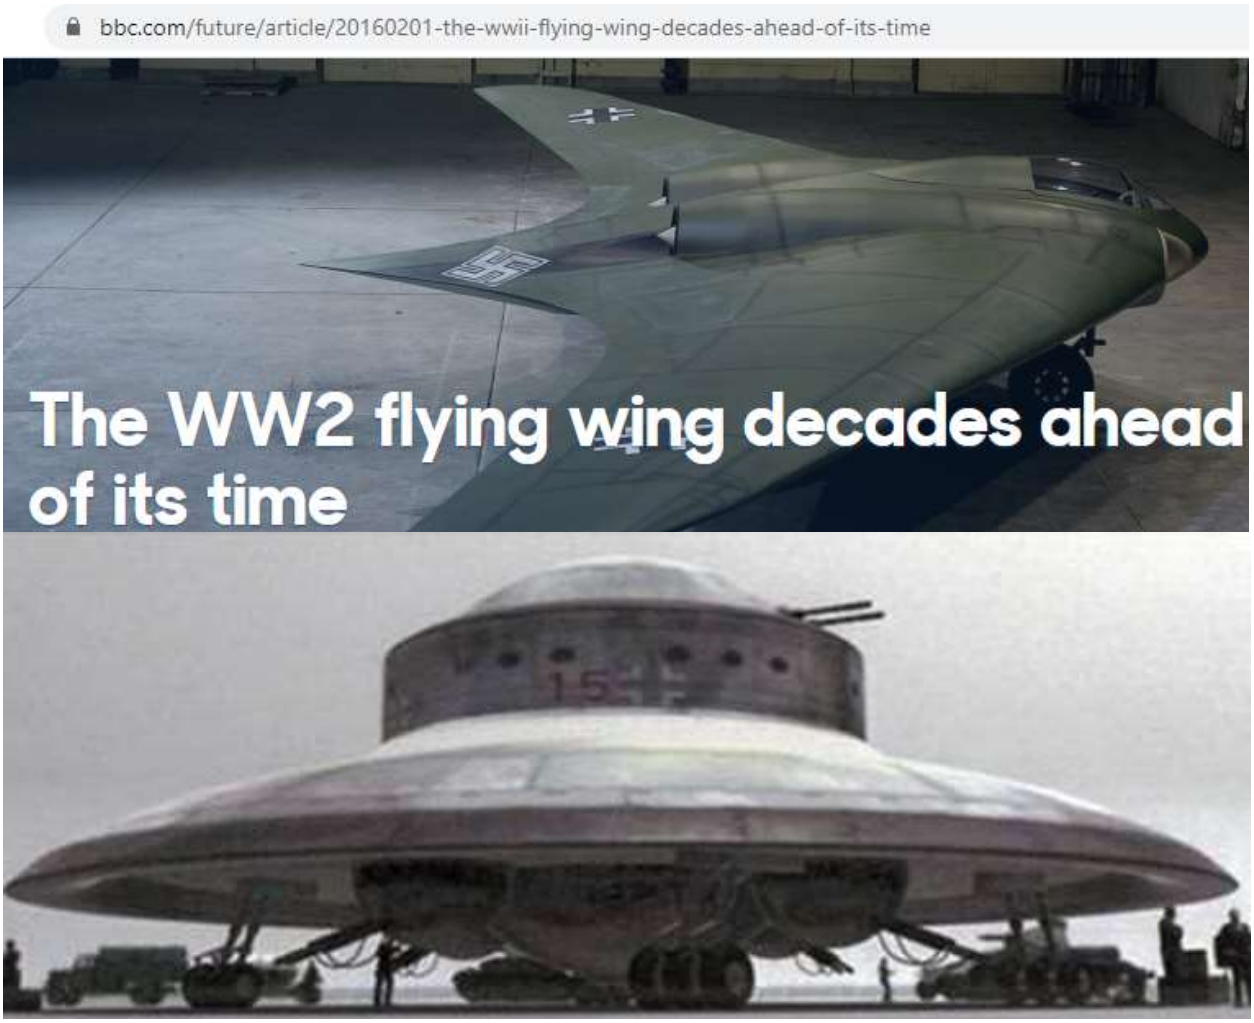
These sightings may be explained by the location of America's most secret aerial space research bases such as the infamous Area 51. These areas may be selective sites used for psy-op response management. Populations in cities such as Tucson are much smaller than Los Angeles. These eyewitness testimonies may be authentic. A combination of these explanations may be valid for each sighting.

Skies, phone lines light up Ariz.

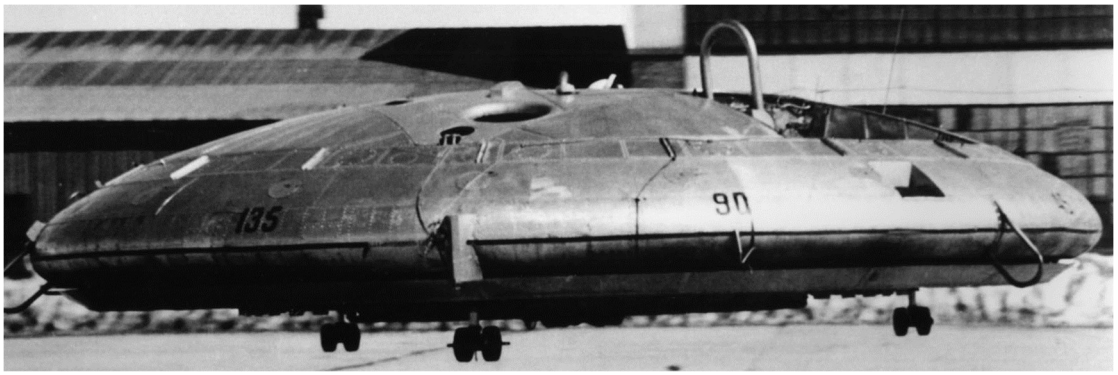
By Scott Troyanos

Unidentified: For 106 minutes on March 13, people saw something like this V-shaped object flying over Arizona. UFOs? The only thing certain is that it still haunts them. 4A.

Many private researchers claim that allied forces confiscated German flying saucer aerial craft at the conclusion of the Second World War. Some of these claims have never been confirmed by official defense or government sources. These images may arouse readers to inquire further.



Daily Star (2018)



USAF (2012)

Nothing digital can be believed. Period. Think about all those fake Fakebook friend suggestions of digital people who obviously don't exist. These videos seem to show the super-gorgeous, fabulous TR3B Aurora, anti-gravity craft flying in Afghanistan. She is so secret that these American soldiers run away from this US Air Force delta darling as they don't recognize her.

As convincing as these videos appear, they are possibly just movie fiction. Think 9/11 style CGI. This author's hunch is that they are selective military disinformation leaks. If these were top secret leaks, they would have been erased from YouTube by America's military or by Google.

Languages

Deities, aliens, UFOs and other entities that may appear when Blue Beam goes live, will supposedly communicate using spoken and/or written words. If Blue Beam is an authentic project, it is possible that its masterminds may select or fine-tune their chosen modes of communications at the last moment. Most Blue Beam theorists speculate these modes include:

1. Text message communications sent to all owners of cell phones.

   Similar messages may be auto sent to all popular social media accounts such as Twitter.

2. Voices may be heard coming direct from the sky.

3. Voices may be sent telepathically direct to a person's mind.

The last point above is contentious. Telepathic communications are not recognized by any orthodox bioscience technology course. So-called personal communications such as Extrasensory Perception (ESP) and telepathy lay in parapsychology realms. They are supposedly phenomena that are widely reported but cannot be proven using conventional knowledge.

Numerous publishers, such as this example, claim that military microwave hypnosis technology programs aim to send electronic messages to the minds of targeted individuals and communities.

www.nbcnews.com/id/27162401/ns/technology_and_science-science/t/army-developing-synthe

Army developing 'synthetic telepathy'

Similar technology marketed as a way to control video games by thought

Kaleidoscopes

Linguistic diversity is a challenge for an entity that aims to communicate to every person in virtually all regions simultaneously. Sentinel Island and Pitcairn Island are rare examples where everyone in these micro communities speak the same language and dialect without deviation.

How might a person choose to convey a message, for example, to every resident who is based in Kuala Lumpur? It is common for a person who lives in this city to speak one or two or these languages only: Malay, Cantonese, Mandarin, Hakka, Teochew, English. If a mass message was sent to all people in Kuala Lumpur in Malay only, it is likely that this message would eventually be translated to every person who cared to seek out a translation. However, the slowness of such a process would likely damper the instant impact of some all-knowing, all-speaking apparition.

How might the masterminds of Project Blue Beam assure themselves that they have translated their message using subtle subdialect nuances that are local to certain villages? Those of us who have witnessed poor Google Translate translations know that a trashy translation automatically discredits the validity of the person communicating the message. It can offer us a jolly giggle.

Affirm, pictures is make laugh your face? You like?

Leadership

The dominant theme in the Blue Beam literature is that alien UFOs will overtly signal sinister intentions. They may state that they aim to colonize Earth as a slave factory. Many people already view Earth in this light. Alien apparitions may murder, imprison or kill any creature at will. This unprecedented global crisis may catalyze instant global support for the formation of a unified government that merges all nations' militaries. This desire to form a deceitful One World Government is consistent with this author's publications dated 2019. He theorizes that the Trump Administration is fighting a murderous cartel that comprises inbred European royal crime families, European bankers and Beijing. This model summarizes this battle as at December 2019.

Reagan *et al.*

It is common to see references to President Reagan's speech before the United Nations dated September 21, 1987 in Blue Beam literature. This image and his transcript extract appear below.

> *"In our obsession with antagonisms of the moment, we often forget how much unites all the members of humanity. Perhaps we need some outside, universal threat to make us recognize this common bond. I occasionally think how quickly our differences worldwide would vanish if we were facing an alien threat from outside this world. And yet, I ask you, is not an alien force already among us? What could be more alien to the universal aspirations of our peoples than war and the threat of war?"* (Reagan, 1987).

A cynical interpretation of Regan's speech is that he is playing the fake alien invasion fear card to covertly gain support for Project Blue Beam. To this author, the late President Reagan proved many times that he was never part of the Deep State crime cartel depicted on the prior page. The Deep State tried to execute Ronald in 1981 for this reason. It is more likely that Ronald was covertly warning others. Most American Presidents since the 1960s publicly played the UFO card.

Energy

Energy weapons such as microwave lasers have likely existed in America's arsenal since at least *circa* September 2001. This video dated 2003 shows that America's Defense Secretary Rumsfeld stutters when answering a question about whether America's arsenal includes these weapons.

Donald Rumsfeld talks about direct energy weapons

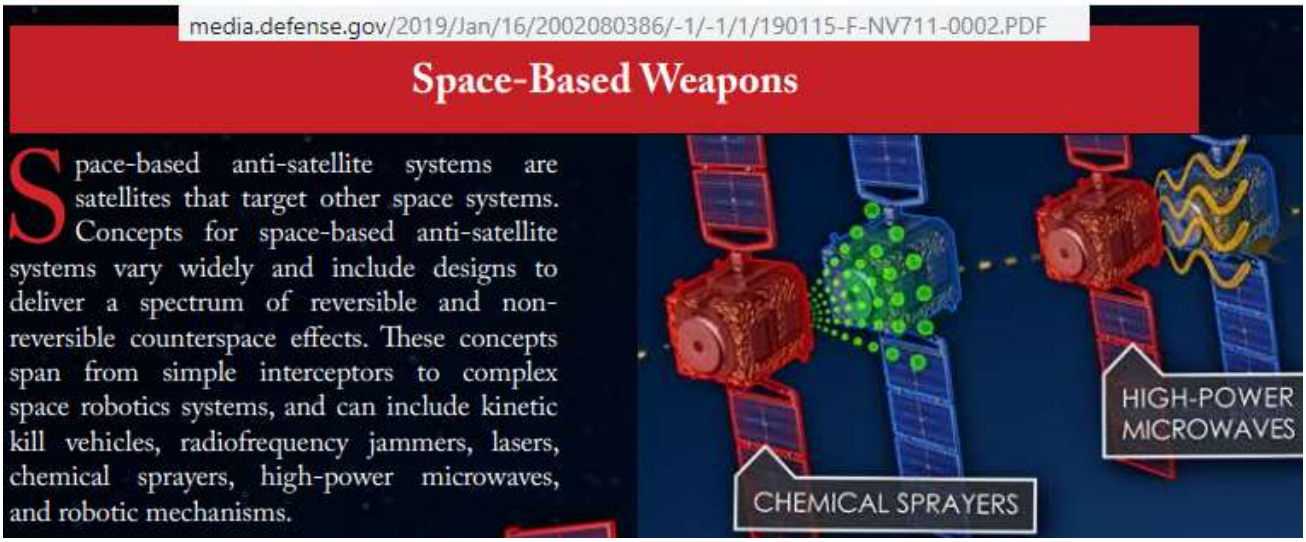
New American microwave weapons:dangers of first use

Recent disclosures that transpired under the Donald Trump Administration indicate that space laser weapons are an advanced operational technology.



Seventeen

Those who care to conduct research into Project Blue Beam beyond this brief introductory booklet may care to research three names. These are Phil Schneider, Rik Clay and Serge Monast.

Rik Clay was an independent researcher and blogger who wrote about Project Blue Beam around *circa* 2007 and 2008. Clay (2008) connects Project Blue Beam to the mainstreaming of questionable environmental 'problems' (*e.g.* Global Warming) and a massive orchestrated financial crash. This sounds a lot like December 2019. Clay died in mysterious circumstances in 2008, aged 25. He died a few days after giving the public interview listed in the references section of this document. He claims that color blue is highly symbolic. For example, he mentions the Israeli Flag, Athens Olympic Mascot and Masonry Blue Lodge as famous examples of color blue.

Phil Schneider was a Project Blue Beam researcher and public speaking lecturer who died in mysterious circumstances on January 17, 1996 aged 48. Philip claimed to be an ex-government civil engineer who built covert Deep Underground Military Bases (DUMB) inside America. He also stated that he was among three people who survived an unreported incident in 1979 between alien Grays and American military forces at the Dulce Underground Base where he was employed.

Note how *The Express* showcase this Schneider speech dated during the 1990s in 2018. This is consistent with the argument that corporate media are currently pushing a UFO threat agenda.

Serge Monast was an independent Canadian journalist who spoke publicly and wrote about his ostensible knowledge of Project Blue Beam for around a decade prior to his death. He died of a heart attack on December 5, 1996 after spending one night in jail. He was aged 51.

CIA's Heart Attack Dart Gun Revealed
Non Mirage Truth Vision • 34K views • 2 years ago
Senators on Capitol Hill examine the CIA's infamous poison dart gun. The weapon was first made public during the Church ...
youtube.com/watch?v=4m6dIdvNECI

Serge published a book titled NASA's Project Blue Beam (1994). A French language version of this obscure, brief, 24 pages book is available for sale on Amazon. Content in Annex 1 claims to be an English language translation of a Monast speech dated 1983 that overlaps with his 1994 book.

Le projet BLUE BEAM de la NASA (French Edition) Nov 2, 2016
by Serge Monast
Kindle Edition
$6.55
amazon.com/Serge-Monast/e/B00QW63FIK%3Fref=dbs_a_mng_rwt_scns_share

The essence of Serge's thesis centers around the four steps Blue Beam deception discussed in part one of this book. Serge's text places this covert project into a broader context. He claims that this scheme underpins the plans to install a New World Order One World Government that is staunchly anti-Christian. He labels this regime 'Satanic'. The noun 'New World Order' is not folklore. Presidents prior to Donald Trump repeatedly used this proper noun in public forums.

VIEW FULL PLAYLIST

This author discovered this narrative about indie flick *Gray State (2017)* while researching Project Blue Beam. The late David Crowley's work likewise falls into the Deep State exposure realm.

The toxic slant of this piece by Deep State darling *The New Yorker* suggests that this rag is deeply threatened by David's work – what it represents and what changes it may cause. Article extracts:

newyorker.com/magazine/2017/04/10/death-of-a-dystopian

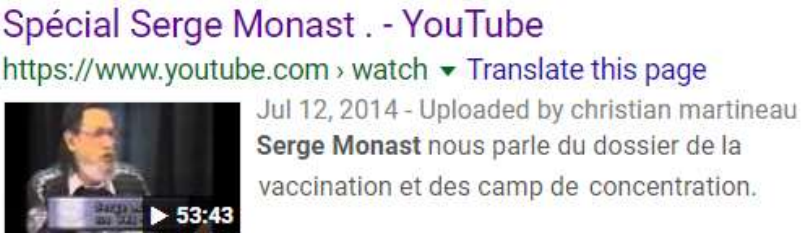
In September, David revised "Gray State" for the Mikes. He wrote for thirty-one hours, then Komel read the script, and he sent it to the Mikes so that it would arrive for one of their birthdays, on September 17th, along with a "Gray State" poster. He was unsettled when they didn't respond immediately.

A neighbor found them. On January 17th, after returning from a holiday trip, he saw the presents scattered on the stoop and figured the family was away. He piled the packages neatly, then heard the dog barking, which he thought was strange, if they were gone. Then he looked in the window.

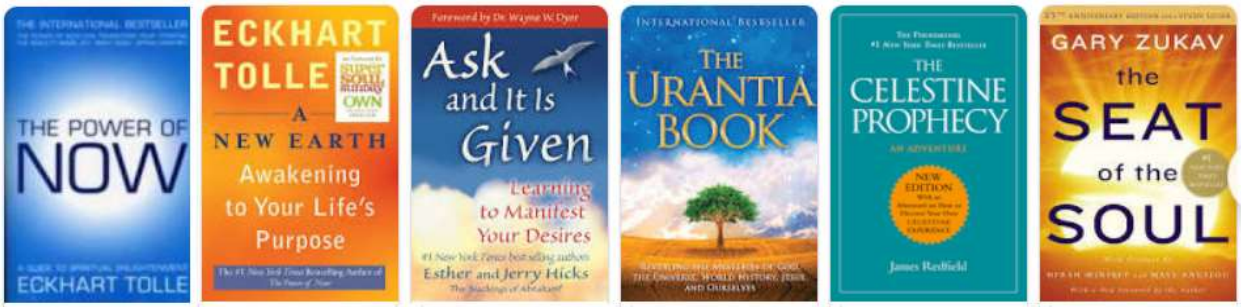
David, his wife and child were assassinated ('suicided') on or around January 17, 2015. Since 2017 America may be a safer place for fearless film makers like David. Fake news seventeen code stories are disproportionately common. There are no more than 31 days in a calendar month.

New Age

Serge Monast claims that the New World Order project aims to replace Christianity as the dominant global religion with a so-called 'New Age' belief system. Serge's public discussions are not accessible to those who cannot speak or read French. You must trust the accuracy of those who claim to offer precise translations. This video talks about vaccines and concentration camps.



The proper noun 'New Age Religion' is a meaningless word without context. This term means contradictory things to different people. Some regard this belief system as being firmly grounded in objective science. Other subscribers to New Age religions reject this term, arguing that mystical interventions and forces that cannot be measured by science influence the life course and destiny of all individuals, collectives and the cosmos at-large. Google classifies these books as New Age.



Many equate 'New Age' with anti-religion spirituality. This approach is dubious. Around one billion or more people of monotheistic religion faiths consider themselves to be 'spiritual'. This is an example of an open-access handbook that aims to offer instruction about this broad genre.

Read Free Spirituality Books publicbookshelf.com/spirituality/

Healing

The world in 2020 faces an unprecedented number of crises that are supported with objective data. The fascist German led European Union dictatorship has used every deceitful maneuver in its Nazi One World Government repertoire to deny the British people their Brexit referendum. As at late December 2019, more than a quarter of pig farms on this planet are infected with Swine Flu. This food crisis could potentially affect more than half of China's *circa* 1.4 billion citizens.

Money laundering mafia crime banks – JP Morgan, Goldman Sachs, Deutsche Bank *et al.* are technically insolvent. Most fiat fairy dust currencies that are backed by nothing apart from trust are on the brink of collapse. Quantitative easing – printing trillions of dollars out of thin air, pushes this world toward hyperinflation. Think Zimbabwe on steroids. A small tin of tuna may cost about USD20 in two years. A rise of *circa* USD18 or 1,000% from today's average prices.

The impeachment farce in America is a symptom of the Rothschild's Bank for International Settlements and Europe's inbred royal crime families rejecting Donald Trump's people before royals polices. Europe's royal crime families set America up with a fake 22 trillion USD debt to enslave her citizens as they shift slave production to China, in partnership with brutal Beijing.

Beijing and the Vatican-European Royal crime families-Rothschild unholy trinity are plotting to crash the global economy and banks. Their goal aims to replace this with a digital cryptocurrency and social credit score spy slave hell gulag system. Such a regime can only work if a person allows their iris scan, DNA or fingerprint to be used as their unique password. Is the year 2020 or 1984?

Eschatological

Most people who discuss Blue Beam theorize that a hologram that depicts the Christian Messiah Jesus will likely be projected via a hologram in powerful, populated Christian nations such as America and Canada. Jesus was aged 33 when he died. Popular depictions of this Messiah show him aged around 33, bearded, with light to medium colored hair. According to some Bible scholars, Thessalonians 4:15-17 talks about the Rapture – the second coming of Jesus Christ.

1 Thessalonians 4:15-17 New International Version (NIV)

15 According to the Lord's word, we tell you that we who are still alive, who are left until the coming of the Lord, will certainly not precede those who have fallen asleep. 16 For the Lord himself will come down from heaven, with a loud command, with the voice of the archangel and with the trumpet call of God, and the dead in Christ will rise first. 17 After that, we who are still alive and are left will be caught up together with them in the clouds to meet the Lord in the air. And so we will be with the Lord forever. biblegateway.com/passage/?search=1+Thessalonians+4%3A15-17&version=NIV

This image is a classic representation of Blue Beam faking the Biblical Rapture.

ATI (2018)

Imminent

Prior to *circa* early 2018, the mainstream fake news media (CNN, Fox *et al.*) usually reported UFO and alien phenomena using slants such as 'strange' or 'bizarre'. It was common for these outlets to mock people who seriously claimed to have engaged directly with aliens, such as flying on a UFO ship from Uranus. This illustration dated 2016 is an example that is skeptical of UFOs.

Psychologists are trying to determine why otherwise rational individuals can make the leap from "prudent paranoia" to illogical conspiracy theories

Is this the origin of the name Elizabeth, as in the late (deceased *c.* 2015) Queen Elizardbeth II?

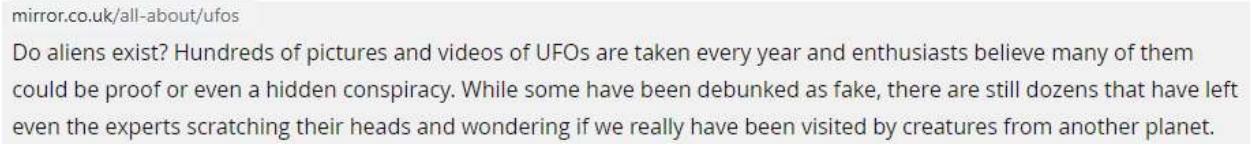
In May 2019, deep state darling *The Washington Post* informs readers that ***everyone*** [emphasis] should believe in UFOs. This order is blatant global mind control and predictive programming.

washingtonpost.com/outlook/2019/05/28/ufos-exist-everyone-needs-adjust-that-fact/

UFOs exist and everyone needs to adjust to that fact

UFOs are not the same thing as extraterrestrial life.
But we should start thinking about that possibility.

Deep State dunce *The Mirror* is one of many news agencies that publish a dedicated UFO page.



mirror.co.uk/all-about/ufos

Do aliens exist? Hundreds of pictures and videos of UFOs are taken every year and enthusiasts believe many of them could be proof or even a hidden conspiracy. While some have been debunked as fake, there are still dozens that have left even the experts scratching their heads and wondering if we really have been visited by creatures from another planet.

These unprecedented events (see overleaf) may be predictive programming live action role play.

The goal of these spectacular air displays may have monitored public responses dated 2017/18.

abcnews.go.com/US/york-city-skyline-turns-bright-blue-transformer-explosion/story?id=60043525

'No evidence of extraterrestrial activity' as massive blue glow reigns over NYC skyline, police say

By **Karma Allen**
December 27, 2018, 11:40 PM

A transformer exploded at a Con Ed facility in Queens, the NYPD said.

Author's name: Karma Allen. Is this a subliminal message – 'Alien Karma'? Bizarre.

Some of the explanations that appear in the corporate media are weird. Some journalists report that high dispersed moisture content in the sky during that evening caused the entire New York City skyline to be lit up by a small transformer explosion in Queens Borough. New York City is an ideal place to monitor the response of the masses to an unprecedented sky show event.

Who knows what the agenda and 'science' behind this SpaceX launch in California on December 22, 2017 was about? Note that the date of this public extravaganza is deep into the festive season year-end holiday shutdown period, similar as the explosion shown on page 27. Deep State Slime magazine overtly offers a connection with this event and aliens in its headline.

Social commentators such as Maureen Callahan (2018), are waking up to the antics of SpaceX's thespian public relations front man. Musk is not a lone star tech genius. SpaceX and Tesla have not collectively generated profits. These private companies combined have sucked billions of dollars in tax subsidies into a black budget black hole. As they are private entities, they are beyond the purview of the Inspector General's audit. Who knows what is going down at Tesla and SpaceX? Who cares?

Worldwide

Serge Monast and most Blue Beam commentators theorize that the United Nations aims to usher in the One World Government Nazi order. To most people, to UN is a benign institution that promotes global peace and the reduction of corruption and poverty. If so, the discredited UN has failed on every indicator. Those who follow geo-politics speculate that the UN Blue Helmet Brigade, its fake Peacekeeping Corps, has a plan to place Americans into Walmart conversion FEMA camps. People may be enslaved, executed and divorced from their children in these camps.

The Globalist Purge UN Invasion, Martial Law, Walmart Closings, FEMA Camps radioactivebsr • 6K views • 1 year ago
For educational purposes and defence in war times of hidden technologies. youtube.com/watch?v=aZ8xFxQE9fA

This mention of America above is not because this book is America-centric. America is the thorn in the side of the Vatican-Beijing-Rothschild-European royal crime families cartel. America's Second Amendment – the right to bear arms, makes this nation the most difficult to conquer. California and Virginia are managing unconstitutional beta testing gun confiscation programs.

Yes, Virginia, the governor really can use the National Guard to enforce gun control
washingtonexaminer.com/policy/defense-national-security/yes-virginia-the-governor-really-can-use-the-national-guard-to-enforce-gun-control December 14, 2019

California adopts nation's broadest gun seizure laws foxnews.com/politics/california-expands-gun-seizure-law

Tomorrows

Project Blue Beam officially does not exist. This proper noun does not appear on .gov search engine databases such as NASA and the White House. This absence means nothing. Grainy private videos and discussions about America's stealth bomber fleet abounded in private circles for about a decade before the full composition of this fleet was officially unveiled during the 1990s. Those who write about Blue Beam explicitly state that this project is a Top Secret covert program.

Thus far, outsiders with an interest in Project Blue Beam have little material to work with beyond rumors and logical speculation such as geo-political trends. Speaking of logical patterns, this author's personal experience concludes that those who prescribe to New Age spirituality tend to be types who are least influenced by government policy, government propaganda, commercial trends, fake news media and religious programming. This is merely anecdotal observation.

Commercially available hologram technology existed in the last century. The *modus operandi* of a fake sky show is consistent with military-government psychological operations that run this planet. Most of America's missing 21 trillion dollars (Skidmore & Henion, 2017) were likely spent below Earth on Deep Underground Military Bases (DUMB). A Project Blue Beam fake sky show is a classic case of look over here, and don't look over there. Ignore those 500 or so DUMBs.

According to folklore, cornered rats run up their attackers' legs and bite their faces. This sheer desperation analogy may be an apt metaphor for last gasp fake news UFO stories. A Trump card has been played on the unholy trinity. The deep state's writing wails on a wall. This script is real.

Seeing

The famed idiom in the first image below is more than a clique. 2020 is a world of computer generated images, fake digital news articles and phony school *curricula*. It is near-impossible to know who to trust. Your primal instincts may offer you the best first point of reference.

CEI This image supposedly shows millions of coffins at a FEMA camp in Georgia.

GG (2019)

Digital images and computerized content are the same as oral traditions. They may be fake, altered or exaggerated. Some are true. 'Seeing is believing' needs to be refined for these times.

Seeing is believing … unless it's a holographic projection, digital content or the like.

12 reasons why Project Blue Beam is never going to happen or succeed

1. Critical mass: too many people may be asleep and alone to witness the event.

2. Blue Beam may work as a one-off event but not as a repeat event. Critical observers will be looking for flaws in repeat events. It must be a perfect execution first time around.

3. The complexity of languages (page 17).

4. Not everyone knows about or believes in the Rapture and other religious equivalents.

5. High stakes desperation – this deception may be the false flag of false flags that finally wakes up the global populace into realizing that this world is run by royal arch deceivers.

6. Countries such as India have multiple religions that are popular among more than 20 million followers: Hindu, Islam, Sikhism and Christianity as examples in India.

7. The mastermind controllers have no global precedent to draw upon. 9/11, which only affected a small part of New York City, is the closest precedent.

8. An alignment of the five major powers on this planet are essential: Jesuits (Latin America *et al.*), Saxe-Coburg & Gotha clan (Commonwealth), Russia, China and America.

9. Not all people will care to come outside and watch it. For example, they may assume that this hullaballoo raucous is just another New Year's Day pyrotechnics sky stunt.

10. Skepticism of mainstream fakery has reached a critical mass in recent years.

11. The United States Armed Forces will block/expose such New World Order mass treachery.

12. It may be technically impossible to coordinate this event worldwide simultaneously.

NASA'S PROJECT BLUE BEAM

by: Serge Monast - 1994

This is the International Free Press in Canada (address given, no longer valid - International Free Press Network, P.O. Box 177, Magog, Quebec, Canada J1X3W8). The International Free Press Network is not a religious group, neither a political organization, but and independent worldwide investigation press agency, in the field of politics, economic, medical and military.

We specialize ourselves in investigating and publishing special reports and audio tapes to expose the under world of the United Nations' conspiracy to implement a New World Order.

Our task is to make the people realize that the coming of the New World Order is not a dream, neither a paranoid thought. It is a real Satanic under going project.

For what?

To abolish all Christian traditional religions in order to replace them by a one-world religion based on the 'cult of man'.

To abolish all national identity and national pride in order to establish a world identity and world pride.

To abolish the family as known today in order to replace it by individuals all working for the glory of one-world government

To destroy all individual artistic and scientific creating works to implement a world government's one mind sight??

And that kind of declaration of war from the United Nations is for:

the implementation of a universal and obligatory membership to the United Nations, as transcending of the United Nations by multi-military and multi-police force;

a world wide Justice Department through the United Nations with an International Criminal Court;

a world wide new Trade Agreement for all nations;

the end of cold war -- of local war like it is today, and the obligation for co-existence for "peace";

and also, a New World Religion and a New World Culture for all men.

If we really wish to understand the Blue Beam Project -- NASA's Blue Beam Project -- where is that from?. . . we have to go back to the dawning of the Age of Aquarius. Remember that song? That song said:

When the moon is in the seventh house, and Jupiter aligns with mars, and peace will guide our planet, and love will steer the stars.

This related with the year 1982, to be at that time the opening of the conspiracy for the Age of Aquarius. Just before the implementation of the New World Order, supposed to start at that time in 1983... and I have to say that the Blue Beam Project was set up for the year 1983.

It has been delayed at that time. We don't know exactly why, but since 1983, makes eleven years they've really improved themselves with new technology and through space, that enable them right now to make their space show possible.

So, the goals of the New Age movement under which the United Nations operates right now, are the implementation of a New World Messiah.

The tools of the new world government are a multi-national army -- an international army; an international police force; a World Bank for the economy; a World Government under the United Nations; a World Conservation Bank for wilderness around the world. That means that all green movements will be melded into this new International Bank or will disappear. A World Religion where all church doctrines will be destroyed at the roots to be replaced by the new religion of the Age of Aquarius.

The world seven rate classifications for all men and women - the new paradise, they said - where everybody will have a predetermined work to fill out whether they agree or not; the world concentration camp headquarters at the United Nations for those who will not accept the new system; the world agriculture and food-supply control which will control food and vitamin supplies all around the world.

The New World Order will be an in-between government system from old USSR, Great Britain and its commonwealths, and the actual United States with its melting-pot population. This is at the end... a new spiritual-political world order which will replace the old one in which we live right now.

What are the New World Order plans? They plan the destruction of all people who believe in the Bible, who worship Jesus Christ, and the complete disappearance of Christianity to achieve this plan.

The New World Order will change nations' laws in order that Christian religious beliefs and symbols - like the cross for instance - will be come unlawful. Only Easter and Christmas for instance will be replaced by New Age festivities around the world.

The New World Order plans also the abolishment of all currencies and the transfer to electronic cash through the super highway -- what we call also, the electronic highway. The thinker and the basic doctrine books of the New Age conspiracy for the New World Government are -- and listen to the name of those people because all the new way of thinking of the New World Order are from those people, those authors who wrote different kinds of books which are the basic belief of the New Age movement:

Helena Petrovna Blavatsky, who wrote *Isis Unveiled* and *The Secret Doctrine*.

Alice A. Baily who wrote *The Race* and *the Initiation* and the *Externalization of the Hierarchy*. Also, *Initiation, Human and Solar;* The *Reappearance of the Christ* - their Christ is the new messiah; *The Destiny of the Nations,* in which they plan what they're going to do with the actual nation-state.

The *Unfinished Autobiography* , *Discipleship in the New Age*, *Esoteric Psychology* -- that's a writing of Alice Baily, very important for all New Age thinkers who are exactly the ones who plan the New World Order.

Also the writing of Nicholas Roerich wrote Mitreya, that's their new messiah; Shambala the Resplendent; The Agni? Yoga Series.

Also the writing of David Spangler who wrote *Revelation, the Birth of a New Age*, considered as a valuable insight to the New Age movement. *Reflections on the Christ* which is related to the Luciferian initiation; *Links With Space*, which relayed as supposed to be big space show in which aliens are supposed to come to save men. *Relationship and Identity; The Laws of Manifestation;* New Age ?, and *Toward a Planetary Vision* which is directly related with the New World Order as they plan it to be.

Now, what do those people also plan?... and as I said before, this is not a dream and this is not paranoid thinking. This is real. So they plan ... to accept the New World Order, people will have to accept first the New World Religion. To enter into the New World Religion, the Christians will have to abdicate their own beliefs.

So as they said, especially Benjamin Creme, David Spangler, Alice Baily, Helena Petrovna Blavatsky... all said that the initiation will be on a world basis, inside the new organized Christian church and is a Masonic Lodge, and Order organization. It will be based on a Luciferian initiation, so what we have to understand here is: it won't be possible for somebody who will hold tight to his own Christian beliefs to get into the New World Order. That will be impossible.

Now for those who will not accept the NWO, who will reject it, the new age people -- the new ager, the new world order people, which is the same -- they plan concentration camps - re-education camps - and for those camps they made what is known to be the rainbow color classification of the new world order prisoner. The rainbow considered as the bridge symbol leading to the Satanic world of the New World Order.

We already do know for instance, that everybody will have to take an oath to Lucifer with a ritual initiation in order to cross that bridge into the new World Order. All resisters to that initiation, as they plan, will definitely be sent to a detention facility where they will be separated in different categories. That's what they call the rainbow color classification of the New World Order prisoner.

Classification of Christian children, as they plan it, are to be used as human sacrifice. Where? Within the black mass ceremonies, they will participate in any kind of sexual orgy, some to be kept as sexual slaves.

Classification 2, which is the classification of prisoners to be used in medical experiments where drugs and new technologies will be tested on humans.

The 3rd classification is the classification of healthy prisoners for the international human organ center, where their vital organs will be removed one by one while they will be be maintained in life with special life-support systems.

Classification 4, for all healthy underground workers. The new world order is a basic worldwide dictatorship based on the Luciferian religion. A dictatorship with the appearance of an international democracy. In order to maintain that democracy illusion, camps and slave labor will be hidden from the populations of the earth. Just remember, for instance, how Hitler covered up the maternity in the concentration camp in his time.

Classification 5, which is the classification of uncertain prisoners in the international re-educational center, where they will be re-educated in order to repent themselves on worldwide t.v. and where they will learn how to glorify the virtues of the new world order for humanity.

Classification 6, which is the international execution center. We're still waiting for details on the 7th rate classification as well as we're still waiting for proof on the color classification for each prisoner section.

Now, those people... this is what they plan in their new paradise world. So you have to understand that when I decided to release - about six months ago - some tiny parts of information concerning their most secret project, which is the NASA Blue Beam project, I was not sure at that time if I would survive my stand against the new world order's most sophisticated project, set up to put down on their knees all men of all nations, cultures and religions.

But now, following my own Christian conscience, my real and deep love for all my unknown brothers and sisters in America and other parts of the world, I fully accept to give my life it that has to be the case, for the truth, for Jesus Christ, by releasing for the first time ever the four major steps of the satellite Blue Beam Project

What I ask to everyone who will read and hear the description following: It is not to be paralyzed by their natural fear but to spread every word of the contents of this ninety-minute audio tape and to gather together in order to pray, to think and to plan different ways they will organize themselves to survive the New World Order government showdown and power-taking. Because what we have to understand is the New World Government won't be something permanent - immortal. This is not the case. But what we have to do and what we have to think right now is how to organize ourselves to survive such tyranny, such Satanic plans.

Now, the famous NASA Blue Beam Project has four different steps. Four parts toward the implementation of the New World Religion with the anti-Christ at its head. And we must remember that the New World Religion is the basic foundation for the New World Government. Without that New World Religion, such government, such worldwide dictatorship is completely impossible. That's why the project is so not only so important to them, but was so well kept secret to now.

The first step concerns the breakdown of all archeological knowledge. It deals with the set-up of earthquakes at certain precise locations of the planet where supposedly new discoveries will suddenly explain - for them - the wrong meaning of all major religions' basic doctrines. This classification used to make the population believe that all religious doctrines have been

misunderstood and misinterpreted have already started with the field of psychological preparation for populations for the first step has been prepared through films like 2001 a Space Odessy; the series, Star Trek; Star Wars which deals with space invasion and space protection; and the last film, Jurassic Park, dealing with the theory of evolution.

Now, which is important to understand in that first step is that those earthquakes will hit at different parts of the world where scientists and archeological teachings have been taught in the past where supposedly there were some hidden secrets. By those kinds of earthquakes it will be possible for them to rediscover again - supposedly, okay? - rediscover again those kinds of secrets and those secrets are meant to discredit all the religions' basic doctrines.

This is the first preparation for the plan for humanity, because what they want to do is to throw down, to shake up the beliefs of all Christians on the planet. And to do that they need some false proof, supposedly from the past, and from the far past that will "prove" to men and women that their religions are false.

The second step deals with the gigantic space show with three dimensional optical holograms and sounds, laser projections of multiple holographic images to different parts of the world, each receiving different images according to predominating regional/national religious faith. This new god's image will be talking in all languages. Now to understand that, we have to go back a little bit in different Secret Services research done in the last 25 years. Like this one:

The Soviets have manufactured the advanced computer, even imported, and fed them with the minute psychical particular base under studies about the anatomy and the biology of the human body; and the studies about the anatomy, the chemistry and the electricity of the human brain. These computers were fed as well, with the different languages and their meanings. The dialect of people have been fed from the Nature Truth satellite. The Soviets started to feed the computer with objective programs like the ones New Messiah. It also seems that the Soviets now, the new world order people, ?? to suicidal methods with the human society by allocating an electronic wave on every mind for many persons in different societies.

Now, there are two different things in that second part. The space show and where that space show comes from. The Space Show, the holographic imaging will be used in a simulation of the ending in which you are given scenes which focus on fulfillment of that which is a desire for you to protect? to fit the needs of those adversary ??.

The results of this deliberately staged false Christ will be for the implementation of a new universal religion. Enough tricks will be foisted on us to hook us into the lie. The Project is the ability to take up a whole bunch of people as in a rapture type of situation and to whisk the whole bunch into never-never land.

The calculated resistance to the New World Religion, the New World Order and the New Messiah will be ? on a massive scale in the ensuing Holy Wars. The Blue Beam Project will pretend to be

the universal fulfillment of the prophesies of old, as nature and even as that which took place 2,000 years ago.

In principal, it will make use of the sky as a movie screen, a space based laser generating satellite projects simultaneous images to the four corners of the planet in every language and in every dialect according to region. It deals with the religion aspect of the new world order and is a large scale seduction.

Computers will coordinate the satellite and software will run the show and tell. Holography is based on very nearly identical signal, combining to produce an image or hologram with deep perception which is equally applicable ?? to ELF, VLF and LF waves. It is an optical phenomena.

Specifically, the show will consist of laser projection of multiple holographic images to different parts of the world, each receiving a different according to predominating regional/national religious faith. Not a single area will be excluded.

With computer animation and sound effects appearing to come from the depths of space, astonished followers of the various creeds will witness their own returned messiah in spectacularly convincing life-like realness. Then the projection of the Christ, of Mohammed, Buddah, Krishna, etc. will merge into one after ?? explanation of the mysteries, prophecies, and revelation will have been disclosed.

This one god will in fact be the anti-Christ who will explain the various scriptures have been misunderstood, that the religions of all are responsible for turning brother against brother, nation against nation; therefore the world's religions must be abolished to make way for the Golden Age, New Age of the One World Religion, representing the one god anti-Christ in this instance they see before them.

{At this point -- interrupting the transcript -- I'm compelled to include three statements from the Protocols of the Learned Elders of Zion. j.p.}

"When the hour strikes for our Sovereign Lord of all the World to be crowned it is these same hands [the mob] which will sweep away everything that might be a hindrance thereto." Protocol No. 3.

"Ever since that time [French Revolution] we have been leading the peoples from one disenchantment to another, so that in the end they should turn also from us in favour of that King Despot of the blood of Zion, whom we are preparing for the world." Protocol No. 3.

"However, it is probably all the same to the world who is its sovereign lord, whether the head of Catholicism or our despot of the blood of Zion." Protocol No.4.

Naturally this superbly staged ?? falsification will result in social religious disorder on a grand scale, including millions of programmed religious fanatics, through demonic possession cases on

a scale never seen before. In addition, this event will occur at a time of great political anarchy and general tumult at the edge of something big... the United Nations, even though it plans to use the Beethoven song of joy as the official Anthem for the New World Order.

Now, if we put this space show and parallel with the star war program we get this: Combinations of electro-magnetic radiation and hypnosis have also been the subject of intensive research. In 1974, for instance, researcher G. F. Shapis? said of one of these research proposals and this investigation:

"It will be shown that the spoken word of the hypnotist may also become varied by modulated electro-magnetic energy directly into the ?? spot of the human brain, without employing any technical device for receiving or transporting the message and without the person exposed to such influence having a chance to control the information input consciously.

It may be expected that they rationalize their behavior and consider it to be under taken out of their own free will."

Anybody investigating so-called channeling phenomena right now would be wise to take this area of research into consideration. It is interesting to note the fact that the number of people who consider themselves channelers have escalated rapidly since this type of research was conducted.

It is uncanny how similar their messages are regardless of which entity they claim to be the source of their divine guidance. It would suggest that any individual considering the content of channeled information should be discerning and critically evaluate where the message they are receiving or considering it empowering or would serve to invoke thought patterns beneficial to the New World Order.

The Sidney Morning Arrow? published an item on March 21st, 1983 which asked ?? ?? ?? . The article states that a paper entitled "The Soviets are Invading the Human Mind" has been submitted to the newspaper foreign editor by Dr. Nathan Ab ??, Assistant Professor in the ?? ?? ?? in Egypt. It is worth quoting the article at length even though his grammar is a little old.

This article relates with the subject who manufactured the advanced computer we were talking about a few minutes ago, and which is really important, because these kinds of computers can be around through satellite into space. The computers were fed, as we said as well, with the different languages and their meanings; the dialect of the people has been fed from the Nature Truth satellite.

The Soviets started to feed the computer with objective program. Today, we're not talking about the Soviets, we're talking about the United Nations, the new world order's people. They're the ones who feed the computer right now with objective programs.

Also, the editor of the column in which the article was printed even states, "We think it makes sense too important to ignore." I think that it is considerate way of putting it. One disturbing possibility, given all the information we have at hand, is that the individuals involved in this potential ? mind control operation could then sell the program and not even be aware that they are conducting such an operation.

Now, figure it out how far they can go right now.

Now, these techniques push us toward the third step of the NASA Blue Beam project that goes along with the telepathic electronical two-ways communication where ELF, VLF and LF waves will reach the people of the earth by the inside of their brain making each one to believe that his own 'god' is talking to each one from within his own soul.

Such waves from satellite are fed from the memory of computers which store a lot of data about the human being and the languages. These waves will then interlace and interweave with the natural thinking to form what we call ?? artificial talk. Now that kind of technology goes into the 1970's, 1980's and 1990's research where the human brain has been compared to a computer; information is fed in, processed, integrated and our response is then formulated and acted upon.

Mind controllers manipulate information in the same manner as a computer for grammar manipulates information.

In January, 1991, the University of Arizona hosted a conference titled "The NATO Advanced Research Workshop on Current and Emergent Phenomena in Bio-Molecular Systems".

What does that mean exactly? That means this: If we refer to one paper that was delivered at the conference, stood out for its different attitude toward the development under discussion at that time. It was in effect a protest and a chilling warning to the attending scientists about the potential abuse of their research findings.

Now, what does that paper mean, and state? It states that the United States has ?? communication equipment which can make the blind see, the deaf hear and the lame walk. It can relieve the terminally ill of all pain without the use of any drugs - and I'm not talking about science fiction over here - a man might retain the use of all his faculties up until the day of his death.

This communication equipment depends on the new way of looking at the human brain and neuro-muscular system and ?? radiation pulse at ultra low frequency. Some of this equipment is now operational within the Central Intelligence Agency - the CIA - and the Federal Bureau of Investigations. It will never be used to make the blind see and the deaf hear and the lame walk, because it is central to the domestic political agenda and foreign policy of the late president Bush.

Domestically the new communications equipment is being used to torture and murder persons who match profiles imagined; to be able to screen a given population for terrorists; to torture

and murder citizens who belong to organizations which promote peace and development in Central America; to torture and murder citizens who belong to organizations opposed to deployment and use of nuclear weapons; and to create a race of slaves called automatons, or what it is popularly called, the Manchurian Candidate.

Over seas experimentation is taking place on ?? by the United States and Canada, Great Britain, Australia, Germany, Finland and France. In addition there has been a long series of ?? among British computer scientists of all who have some connection to the United States Navy.

What is possible to ask here in front of such a psychology of terror as this? Would any government, corporation or psychiatrist willfully promote such horror today? The answer is quite obviously, "yes". Government agencies and the corporations that work with them toward New World Order are prepared to promote anything that will help them to achieve their objective of total social control.

As for the question of 'why?': for one thing, if you terrify the public and make them fear for their safety they will allow you to implement draconian law enforcement practices, disarm them and keep extensive records on them and they only have to tell you, "Well, that's all in order to protect you, of course".

And secondly, it promotes the decay of the current form of democratic political system and leads societies to search for alternatives to current political methodology.

Of course, the alternative has already been planned. It is called New World Order and it won't have your safety or interest at heart. As George Bush. said, "read my lips."

Fear has always been used by powerful elite to control and subjugate the masses. The old maxim "divide and conquer is being played out to the limit in every corner of the planet to ensure that everybody is frightened for their personal safety and scared or suspicious of those around them. This too, it is called mind control.

Now, to go a little bit further in that new technology which is at the basis of the NASA Blue Beam project, we have to consider this quote from psychologist Gene V McConnell, which was published in a1970 issue of "Psychology Today". He said,

"The day has come when we can combine sensory deprivation with drugs, hypnosis and astute manipulation of reward and punishment to gain almost absolute control over an individual's behavior.
It should be then possible to achieve a very rapid and highly effective type of positive brainwashing that would allow us to make dramatic change in a person's behavior and personality."

Now when we talked before about that kind of rays and the telepathic electronic two-ways communication... the kinds of rays which are fed from the memory of computers which store a

lot of data about the human being and the languages; and we said that the people of the earth will be reached by the inside of their brain making each one to believe that his own 'god' is talking to each one within his own soul, we refer to that kind of technology and that kind of thinking.

That same psychologist said,

"We should reshape society so that we all would be trained from birth to want to do what societies want us to do. We have the techniques to do it. No one owns his own personality."

And this quote here is real important because it is also basic teaching from the United Nations, that 'no one owns his own personality'. The same psychologist adds:

"You have no say about what kind of personality you acquire, and there's no reason to believe you should have the right to refuse to acquire a new personality if your old one is anti-social."

Which is important in that kind of declaration here, if the NWO will be set up over the old one, that means that the old way of thinking, the way we think right now - our behavior, our religious beliefs - would be considered by those people as old thinking, an old way of living, and they will have -- to change it -- the re-education camps of the United Nations, to make sure that people will have -- for them an anti-social behavior which is today an actual one -- will be re-educated in a way to have the new behavior to fulfill the needs of the NWO.

Might it be the largest mind control project ever? because NASA Blue Beam Project is also for the implementation of a New World Religion, a mind control project. So I would suggest you examine the evidence carefully before you disregard this possibility.

Now, if we go further in the different reports we have over here, we find this: The mind control operation and technology include a transmitter which broadcasts at the frequency of the human nervous system, which system is manufactured by the Laurel Electro-Optical System in Pasadena, California.

Laurel, a major defense contractor had previously conducted research on directed-energy weapons for Lieutenant-General Leonard Perez of the U.S. Air Force who was searching for a weapon to implant messages into the minds of the enemy and to urge his own truth onto superhuman deeds of valor.

The device employs electro-magnetic radiation of jigars? frequency pulse at extremely low frequency -- ELF. It is used to torture people both physically and mentally from a distance.

Weapons of this type are claimed to have been used against a British woman protesting the presence of American cruise missiles at Greensam? Common Air Base during the '70s.

This weapon can be used to induce total sensory deprivation by broadcasting signals into the auditory nerves at such a power that it blocks the victims ability to 'hear themselves think'. The

device has taken the concept of the old phrase "It is so noisy in here I can't hear myself think", and turned it into a powerful weapon of terror.

The process employed by such ELF technologies are described in various U.S. Defense Department Publications, including one entitled, "The Electro-Magnetic Spectrum and Low Intensity Conflict", by Captain Paul E. Tyler, medical ?, United States Navy, which is included in a collection entitled, "Low Intensity Conflicts in Modern Technology" edit by Lt. Colonel, David ?... U.S. Air Force. The paper was delivered in 1984, and the collection published in 1986 by Air University Press, Maxwell Air Force Base, Alabama.

"Another pulse microwave device can deliver audible signals directly to an individual while they remain undetectable by anyone else. The technology is very simple, and can be built using an ordinary police radar gun. The microwave beam generated by the device is moderated at audio frequencies and can broadcast voices directly into the brain"... and here we come for that NASA Blue Beam Project, as we were talking about at the beginning, the telepathic electronic two-way communications from space goes exactly with that kind of technology.

I repeat here, "the microwave beam generated by the device is modulated at audio frequencies and can broadcast voices directly into the brain".

In his book, The Body Electric, Nobel Prize nominee Robert Becker described a series of experiments conducted in the early 1960's by Olenfree, where this phenomena was first demonstrated as well as later experiment ?? in 1973 at the Walter Reed Army Institute of Research by Dr. Joseph C. Sharp, who personally underwent tests in which he proved he could hear and understand spoken words delivered to him in an echo-free isolation chamber via a pulse microwave audiogram, an analogue of the word sound vibration beamed into his brain.

Becker then goes on to state, "such a device has obvious application and covert operation designed to drive a target crazy with voice or deliver undetectable instruction to a programmed asset".

Now figure out, when we talked about that new messiah from space would be talking to different religious and faith people on the earth by the inside who would give such kind of instruction like to Muslim people what kind of possession case and kind of social disorder on a large case scale ever seen before we would see everywhere on the planet.

A 1978 book entitled, Microwave Auditory Affect and Application, by James C. Lim? explains how audible voice can be broadcast directly into the brain. This technology could be used to make the deaf hear, but instead it has been turned against the public.

Olenfree also reported that he could speed up, slow down or stop isolated frogs hearts by synchronizing the pulse rate of a microwave beat with the beat of the earth itself. According to Robert Becker, similar results have been obtained using live frogs, indicating that it is technically feasible to produce heart attacks which are rays designed to penetrate the human chest.

I should mention also that Becker does not participate in such research. It has been demonstrated that focused Ultra High Frequency - UHF - electromagnetic energy beams can be used to induce considerable agitation and muscular or induce muscular weakness and lethargy. Microwaves can also be used to burn human skin, and aide the effect of drugs, bacteria and poisons, or effect the functioning of the entire brain.

These effects were all studied at length by the CIA on September 21, 1977 in testimony before the Senate Sub-committee on Health and Scientific Research. Dr. Sidney Gottlieb who directed the MK Ultra program at that time was forced to discuss aspects of the CIA's research to find technique of vacuation? the human organs by remote electronic means.

So this is something that exists right now, that has been pushed to its highest degree and that can be used from space by satellite to reach anybody on the planet.

If we go a little bit deeper in that kind of process and mind control over the people, we find for the year 1988 this: the equipment and technology... that kind of technology of mind control have been used to influence politics in a much more direct fashion.

Michael Dukakis, the Democrat Presidential candidate running against George Bush in the 1988 U.S. election, was targeted with microwave technology in order to impede his public speaking performance when the opinion polls he posed a threat to Bush's election prospect. He also claims that the equipment was used against Kitty Dukakis and drove her to the brink of suicide. In the grisly Disneyland World of U.S. politics a presidential candidate with problems such as these two dealt with, obviously stand to lose the race to the White House.

What I can add over here about those kinds of new mental battlefields that will be used in the NASA Blue Beam Project to implement the New World Religion is this: In the December 1980 edition of the U.S. Army Journal, which is called "Military Review", an article by Lieutenant Colonel John B. Alexander, entitled "The New Mental Battlefield -- Beam Me Up, Spock", provides further insight into the technical capabilities now at the disposal of the controllers. He writes:

"Several examples will demonstrate areas in which progress has been made:
The transference of energy from one organism to another.

The ability to heal or cause disease can be transmitted over a distance, thus inducing illness or death for no apparent cause.

Telepathic behavior modification which includes the ability to induce hypnotic states up to distances in excess of 1,000 kilometers has been reported. The use of telepathic hypnosis also holds great potential. This capability could allow agents to be deeply planted with no conscious knowledge of their programming, and .??/ the Manchurian Candidate ? and does not even require a phone call.

Other mind to mind induction techniques are being considered. If perfected, this capability could allow the direct transference of thought via telepathy from one mind or group of minds to a select target audience. The unique factor is that the recipient will not aware that thought has been implanted from an external source. He or she will believe the thoughts are original".

This is exactly what we were talking about, and the third step of the NASA BlueBeam Project calls the telepathic-electronic two-way communication, and the article continues:

"If it is possible to feed artificial thoughts into the ?? genetic ?? via satellite the mind control of the entire planet is now possible. An individual's only resistance to constantly question the motivation behind their thoughts and not act upon thoughts that they consider to be outside the boundaries of their own ethical and moral boundaries. "

Once again, it is wise to consider how television, advertising and various forms of social pressure are constantly being used to manipulate those boundaries.

And one thing... another thing which is really important over here, dealing with that kind of technology is this: It has been reported by Lt.Col Alexander who said in the summary of his Military Review article:

"The information on those kinds of technology presented here would be considered by some to be ridiculous since it does not conform to their view of reality; but some people still believe the world is flat."

Now, this means a lot, because if people do not believe that kind of technology to be possible, or this kind of technology we're talking about is just science fiction... those people put themselves in jeopardy because when the night of the thousand stars will shine from the space during that night when the new messiah and the new world religion will be implemented on the planet, those people won't have time to prepare themselves, and they will not be prepared to preserve themselves against such kind of technology.

That's why they put themselves in jeopardy. Because they don't believe; they don't take time to prepare and this is something real dangerous. Now we're going to talk about the fourth step of that NASA Blue Beam project. Now, the fourth step concerns the universal supernatural manifestation with electronic means. It contains three different orientations.

One is to make mankind belief that an alien invasion is about to strike down on each major city of the earth in order to push each major nations to use its nuclear to strike back. This way, it would put each of these nations in a state of full disarmament in front of the United Nations after the false attack.

The second is to make the Christians believe to a major rapture with the supposedly divine intervention of an alleged good alien force coming to save the people from a brutal satanic attack. Its goal is to get rid of all significant opposition to the New World Order.

The third orientation in the fourth step is a mixture of electronic and supernatural forces. The waves used at that time will allow supernatural forces to travel through optical fiber, coaxial cable... the one used for cable TV, electric and phone lines in order to penetrate everywhere on electronic equipment, appliances will be already installed with microchips. The goal of this one deals with global Satanic ghosts - spector - all around the world in order to push all population on the edge to drown into a wave of suicide, killing and permanent psychological disorders.

Then after that night of the thousand stars humanity is going to be ready to implore any new messiah to re-establish peace everywhere at any cost, even at the cost of freedom abdication. Now which is interesting to note this over here: the technique used in that fourth step is exactly the same used in the past in USSR to force the people to accept Communism. The same technical wave will be used by the United nations to implement the New World Religion in the New World Order.

A lot of people ask me when this is going to happen and how they are going to do it. Which are the steps they're going to set up before that Night of the Thousand Stars? According to different research and different reports that we get, they are thinking right now of an economic crash. Not a complete crash that would put down all the economy, but an economic crash that would force them... that will also have them as a pretext to come up with an in between currency.

That means a new kind of currency that would be in between the currency that we have right now and the electronic cash. Now, what they want to do with the in between currency is to force everybody who has some money in reserve everywhere to spend that money, because they consider that they will have problems to implement the New World Order if somewhere there are some people independent who can survive by themselves, so they have to put the people in a way to force them to spend everything and absolutely everything they have.

That's why they want to start with a kind of organized economic crash to put up a new currency, and after that, they're planning to put on worldwide basis the electronic cash. But right now it is not possible for them to put that electronic cash since the super highway - what we call also the electronic highway - is not yet ready and implemented all over the planet.

To implement the electronic cash worldwide they have to have finished the implementation of the super highway everywhere, and for people wondering what the super highway is exactly... the super highway is an electronic sophisticated way to control directly the people in every home where it will be implemented or installed. To that stage, the control - the political control - of everybody on the planet will be possible.

To prevent any kind of independence from the people we have to remember that the New Agers... the New World Order people will do anything to make sure that everybody, before the year 2000 will have spent all his personal and reserve cash or goods.

To prevent also any kind of independence the New World people have already started, all over the planet, to put into birds, fish and wild animals microchip implants. Why? Because they want

to make sure that for the people who won't accept the NWO, they won't be able to fish or hunt anywhere, because the day they would try in the wilderness to make some fishing and hunting, the day they would catch a fish or an animal with a microchip implant they would be traceable by satellite, absolutely, everywhere.

Those same people to make sure of full control of everybody are changing laws of different countries right now to make sure they will have full control of the vitamins. They are also changing laws right now about religion, and also about psychiatric disorders, in order to consider anybody with a violence potential as somebody who has psychiatric disorder and has to be put in a clinic to be re-educated.

If you keep in mind that this New World Order New World Government is a worldwide dictatorship you cannot forget that a dictatorship will do everything possible to make sure they will be in a position to control anybody everywhere on the planet. That's why the kind of new technology they're putting on right now everywhere is a technology for control of the people.

If you take, for instance, the technology that we had in the 1940s and the 1950s that kind of technology was made to help the people for an easier life. But the new technology - if you take the time to look at computers, microchips, new microchip cars, super highway... you'll notice, and this is evident, you'll notice that all that technology is built in a way to track down and control anybody everywhere. And as that kind of technology is made in such a way, it's made also for a purpose.

To refuse to see that purpose is not to want to see the evidence of a new kind of political power that want to establish themselves all over the planet.

Now, at the end of this conference... I want to apologize to everybodies my difficulties, my problem with English speaking, because as a Canadian journalist I'm also from the eastern part of Canada which is French-speaking country.

I hope that even if I have problems with pronunciation, or a French accent in my speaking, I hope it will be possible for everybody at least to understand the meaning of this conference and also the real meaning of the NASA Blue Beam Project.

And I ask everybody everywhere who will be listening that they make everything possible to spread the words everywhere about that kind of new technology which exists right now into space and which exists for the purpose to implement the New World Religion which is also the basic foundation of the New World Order government.

Thank you and good night.

BEAM EXPERIMENTS RELATED TO THE HEAD-ON BEAM-BEAM COMPENSATION PROJECT AT RHIC *

C. Montag†, M. Bai, A. Drees, W. Fischer, A. Marusic, G. Wang, BNL, Upton, NY 11973, USA

Abstract

Beam experiments have been performed in RHIC to determine some key parameters of the RHIC electron lenses, and to test the capability of verifying lattice modifications by beam measurements. We report the status and recent results of these experiments.

INTRODUCTION

The Relativistic Heavy Ion Collider (RHIC) consists of two superconducting storage rings that intersect at six locations around its circumference. Beams collide in interaction points (IPs) 6 and 8, which are equipped with the detectors STAR and PHENIX, respectively (Fig. 1). With the polarized proton working point constrained between $2/3$ and $7/10$ to achieve good luminosity lifetime and maintain polarization, the proton bunch intensity is limited to $2 \cdot 10^{11}$ protons per bunch by the resulting beam-beam tuneshift. To overcome this limitation, installation of an electron lens in IP 10 is foreseen to partially compensate the beam-beam effect and reduce the beam-beam tuneshift parameter [1]. As part of this project, beam experiments are being performed at RHIC to determine key parameters of the electron lens as well as to verify lattice modifications.

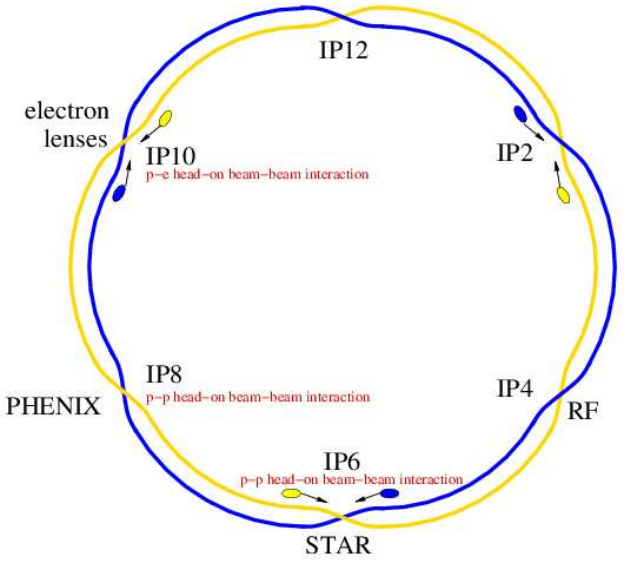

Figure 1: Schematic view of RHIC. Beams collide in IPs 6 and 8. IP 10 will be equipped with an electron lens for head-on beam-beam compensation.

BETATRON PHASE ADVANCE MEASUREMENTS

Full compensation of the nonlinear beam-beam effect experienced in the collision with an oncoming proton beam can be achieved by providing collisions with an electron beam of the same density distribution as the oncoming proton beam, with a betatron phase advance of $\Delta\psi = k \cdot \pi$ between the two locations, as schematically depicted in Figure 2.

In the RHIC beam-beam compensation effort, the phase advance between IPs 8 and 10 will be adjusted to the desired value by additional shunt supplies over the main quadrupoles in that arc, such that the electron lens will act as a compensator for the beam-beam effect experienced in IP 8. Operationally, it is desirable to be able to accurately measure this phase advance, rather than having to scan it for best compensation performance.

Since these additional shunt supplies are not yet available at RHIC, we devised an alternate way to test our capabilities of accurately measure the phase advance between IPs 8 and 10. Due to the six-fold symmetry of RHIC, a tune change ΔQ translates into a betatron phase advance change over one arc of $\Delta\psi = 2\pi \cdot \Delta Q/6$. Using the AC dipole, we therefore measured the betatron phase advance for each pair of adjacent BPMs around the RHIC ring, first for the regular working point Q_x and then for a modified tune $Q_x + \Delta Q_x$. Using $\Delta Q_x = 0.1$, the expected change in phase advance over one arc is therefore $\Delta\psi_x = 2\pi \cdot 0.1/6 = 36°/6 = 6°$. As Figure 3 shows, measurements agree very well with our expectations.

EFFECT OF THE LIMITED CATHODE SIZE

To optimize the head-on beam-beam compensation effect, the transverse distribution of the electron lens beam has to match the Gaussian proton beam distribution. This is achieved by a special design of the electron lens cathode [2]. However, due to the limited size of the cathode the resulting Gaussian electron beam distribution is not Gaussian at large amplitudes and may be approximated by sharp edges, as shown in Figure 4. In the case of the RHIC electron lens, the cathode radius corresponds to 2.8σ of the proton beam. Since sharp edges in beam distributions

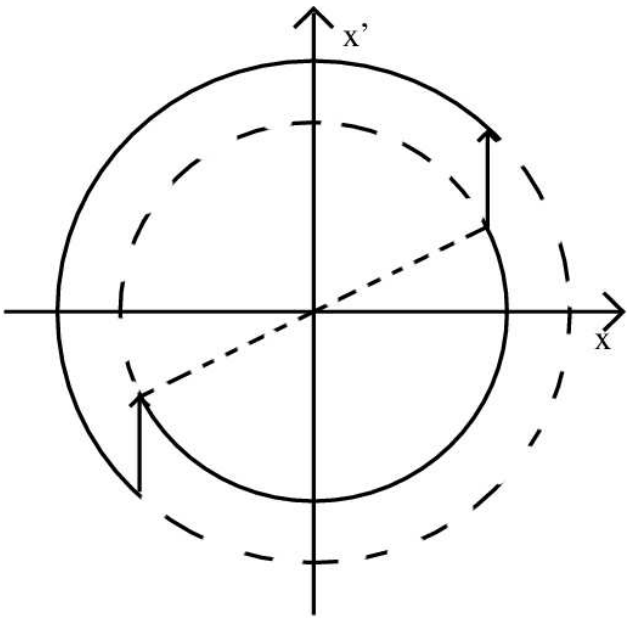

Figure 2: Beam-beam compensation concept. The nonlinear beam-beam kick experienced in the collision with an oncoming proton beam is exactly compensated after a betatron phase advance of 180 degrees by colliding with an electron beam of equal density distribution.

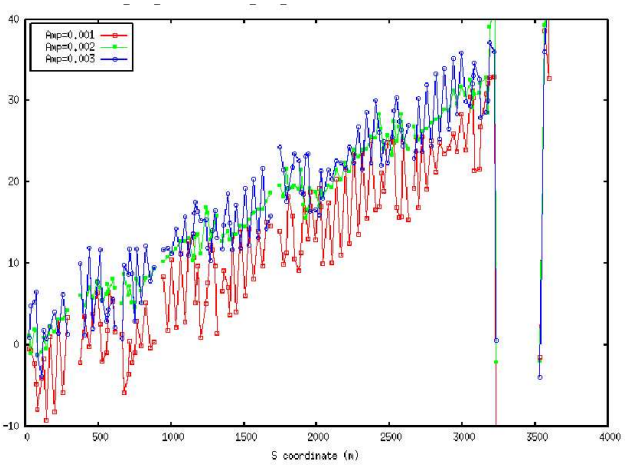

Figure 3: Measured accumulated phase shift $\Delta Q(s) = \Delta\psi(s)/(2\pi)$ around the ring, vs. longitudinal position s.

are known to lead to poor beam lifetime of the oncoming beam, the limited cathode size of the RHIC electron lens is a concern. On the other hand, the number of particles beyond 2.8σ is already very low anyway, and the beam-beam kick of an unlimited Gaussian beam beyond 2.8σ practically shows the same $1/r$ dependency as that of a truncated Gaussian.

To mimick the effect of a truncated Gaussian electron lens beam, two gold beams were brought into collision at injection energy in IP 8. Collimators were inserted into the Yellow beam, creating a truncated Gaussian distribution by scraping away the transverse tails, and the Blue beam lifetime was recorded as a function of the Yellow collimator position. Figure 5 shows the results of this experiment.

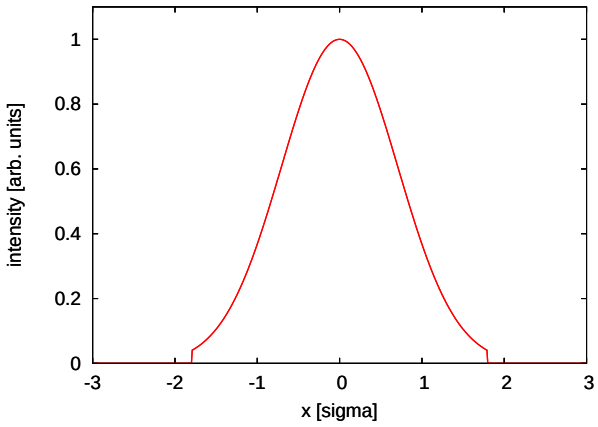

Figure 4: Transverse profile of the Gaussian electron lens beam with its sharp edge at the cathode radius. For better visibility, a cathode radius of 1.8σ is shown here.

Before the Yellow collimators were inserted, the Blue beam lifetime was slowly improving after injection, indicated by a slowly decreasing hourly beam loss rate. This improvement stopped abruptly when the collimators reached a position corresponding to 3σ of the Yellow transverse beam size. When the collimators were inserted to 1.5σ, the Blue beam decay increased significantly, though by this time the Yellow beam intensity had dropped to half its initial value. Shortly after the the Yellow collimators were retracted the Blue lifetime began to improve.

This experiment indicates that the truncated electron beam distribution in the RHIC electron lens may have detrimental effects on the proton beam lifetime. However, on two subsequent attempts these results could not be reproduced due to poor lifetime in both beams. It is therefore planned to repeat these tests with proton beams at full energy. This has the advantage of much better beam lifetime, and the effect would be enhanced by the larger beam-beam parameter of protons compared to gold beams.

LOWERING γ_T AT INJECTION

The lattices with the proper phase advance between IP 8 and the electron lenses in IR 10 require modified integer tunes [3]. Since both tunes in the Yellow ring have to be raised by one integer, this will subsequently lead to an increase in γ_t. With proton beams being injected at $\gamma = 25.4$, γ_t this increased transition energy would result in a bucket mismatch between the AGS and RHIC that cannot be compensated by lowering the RF voltage in RHIC. It is therefore necessary to reduce the transition energy at injection by appropriate lattice modifications.

As reported in an earlier paper [4], lowering γ_t can be

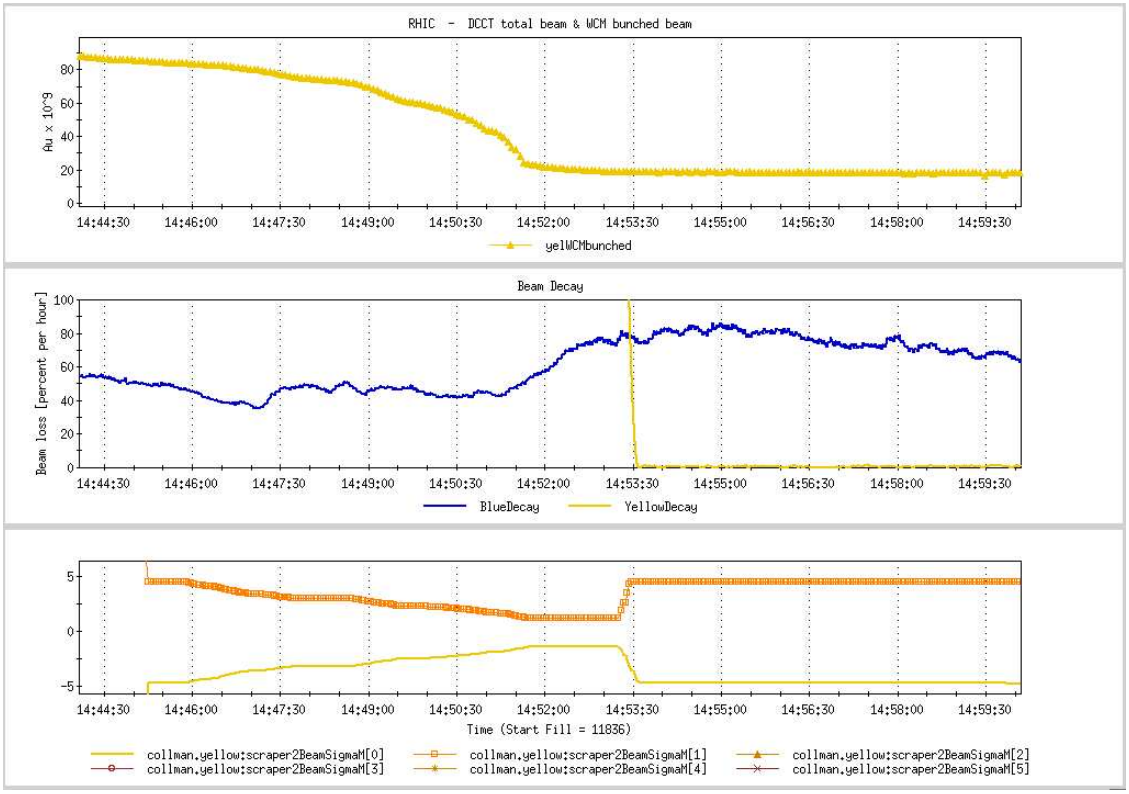

Figure 5: Yellow beam intensity, Blue hourly beam decay, and Yellow collimator position vs. time during aggressive scraping of the Yellow beam.

achieved using the γ_t jump quadrupoles. With the transition energy proportional to the horizontal phase advance in the arcs, where the dispersion function is non-zero, γ_t is lowered by lowering the horizontal phase advance in the arcs. The resulting tune shift is compensated by a set of γ_t quadrupoles in the dispersion-free region at the end of the arcs. In a dedicated beam experiment we were able to reduce the transition energy by $\Delta\gamma_t = -0.35$ relative to its regular value without detrimental effects on beam lifetime due to the associated β-beat; the limitation being imposed by the limited current of the γ_t power supplies.

To further decrease the transition energy at injection, the γ_t jump power supplies could be replaced by regular DC supplies. Since this would also increase the β-beat, additional beam experiments will have to be performed to ensure sufficient beam lifetime. Alternatively, the AGS extraction energy could be raised to $\gamma = 26.0$, at the expense of a two percent decrease in proton beam polarization.

Yes, dozens.	Most ideas are junk. I found a few treasures.	I found no useful ideas.

Alternative argument 1: **Opinion 4**

I need a lot of time to reflect on this book. Many ideas are intense.

Alternative argument 2: **Opinion 5**

This book is about a gossip topic. I have no interest in reviewing it.
